

BROADBAND OPERATORS & TARIFFS

Giving you comprehensive data to compare broadband services at operator and country level across the globe.

Broadband, IPTV and VoIP operator profiles

Point Topic provides individual profiles on approximately 5,200 different fixed broadband services offered by nearly 400 operators from 90 countries. Profiles are updated every 3 months to include the latest information including:

- Company introduction
- Full residential and business service and tariff listing
- Financial performance summary including revenue, EBITDA and net profit
- Year-by-year news timeline of key events

Broadband country overviews

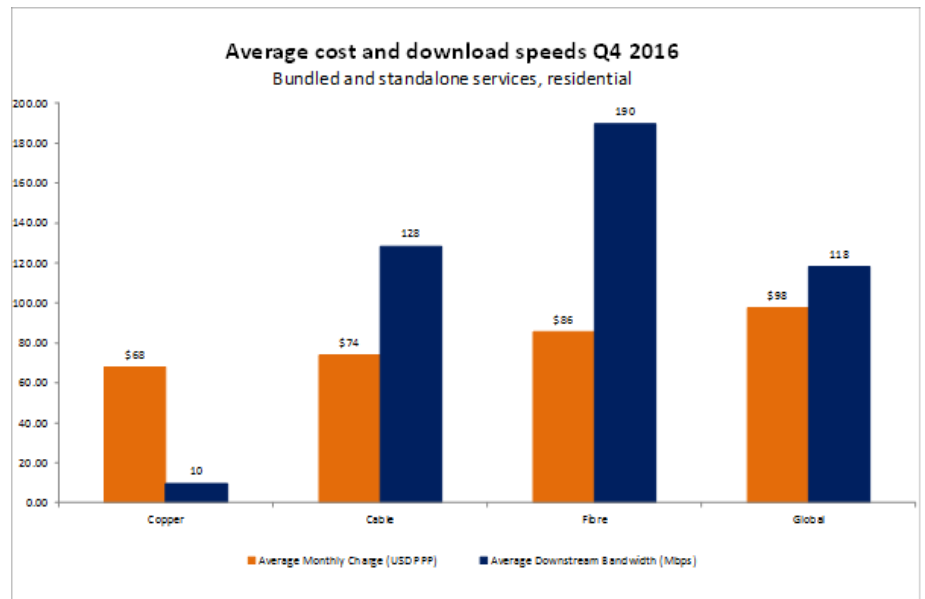

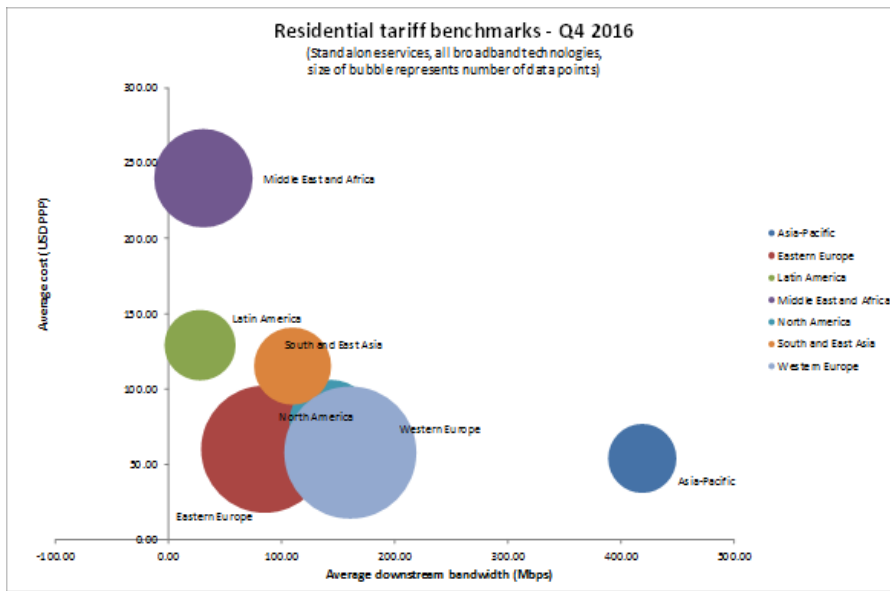

Broadband Operators & Tariffs includes 87 annually updated broadband country overviews which look at:

- Market summary
 - Competitive landscape
 - Incumbents
 - Subscriber numbers by technology
 - Pricing
 - Regulatory issues
-

Residential and business tariff databases

Broadband Operators & Tariffs also gives you a wealth of dedicated tariff information including:

- Full tariff database containing 5,200 broadband tariffs from operators in 90 countries
- Residential tariff tool to allow easy comparison between countries and regions.
- Business tariff tool to allow easy comparison between countries and regions.
- Analyst reports summarising trends across different technologies, countries and regions.
- All tariff databases, tools and reports are updated every 3 months.
