

GLOBAL BROADBAND STATISTICS

Point Topic delivers comprehensive, up-to-date and accurate broadband data at an affordable price.

Our searchable **Global Broadband Statistics** database includes quarterly subscriber numbers for over 500 broadband, IPTV and VoIP operators from more than 100 countries.

What the service provides

- Latest subscriber numbers at operator and country level published every 3 months
- Comprehensive historical data going back to 2002 (and 1998 in some cases)
- Breakdown numbers for all major technologies (DSL, cable modem, FTTx etc.)
- 5-year broadband forecasts for 100 countries
- Statistics for penetration, market share and growth
- Regular analyst reports tracking growth trends in the broadband and IPTV markets

Access Online

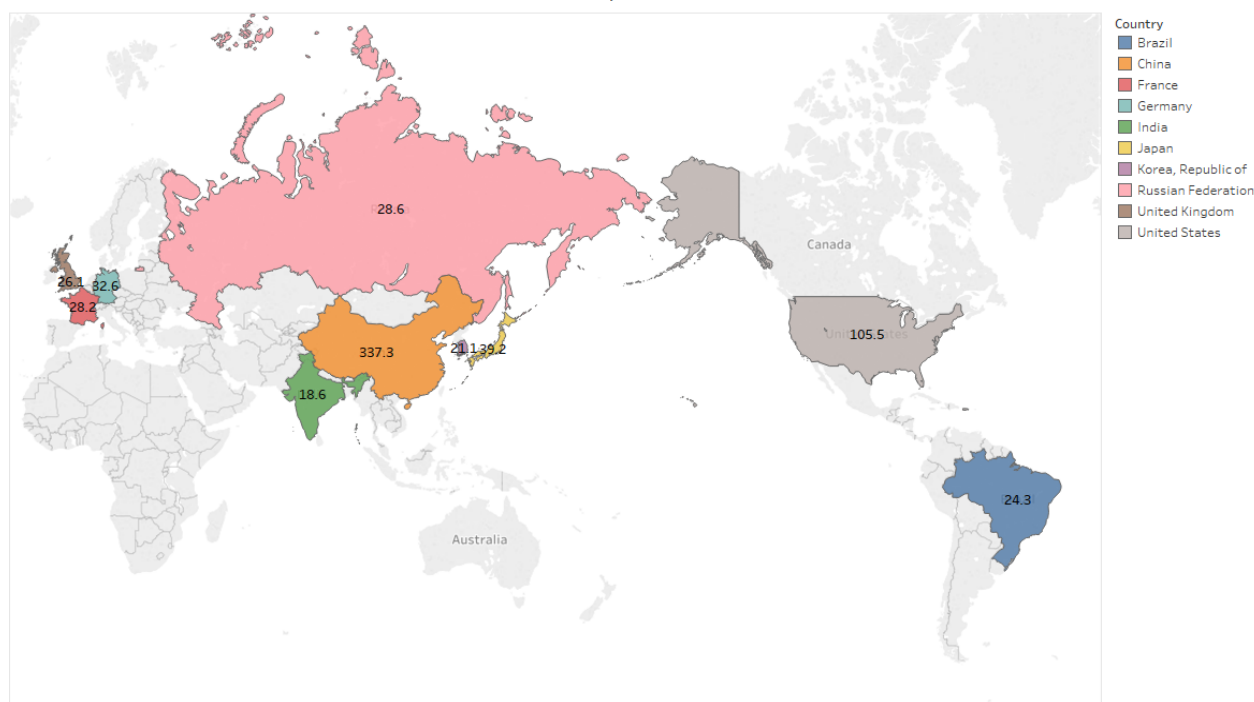

Browse the data at world, global region, country and operator level – including tables, graphs and charts to give you quick and easy access to the information you need.

Analyst reports look at trends across different countries, regions, technologies and markets.

Downloadable graphics help you interpret the information, including household and population penetration, operator market shares, growth and technology splits

Top 10 Countries by Fixed Broadband Subscribers, million (Q3 2017)
