

Global Broadband Statistics

Point Topic delivers comprehensive, up-to-date and accurate broadband data at an affordable price.

Our searchable **Global Broadband Statistics** database includes quarterly subscriber numbers for 600 broadband, IPTV and VoIP operators from more than 115 countries.

Service features include

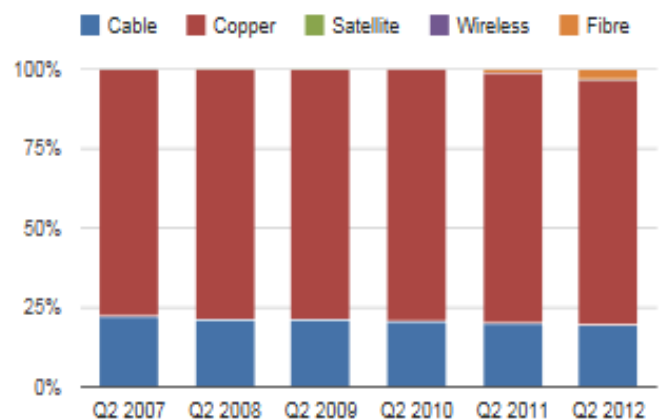

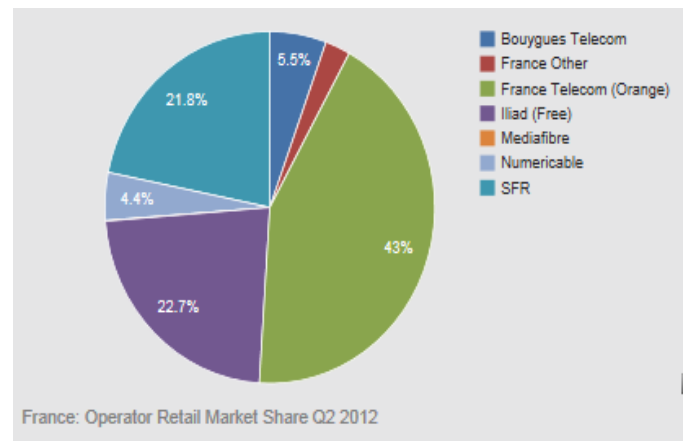

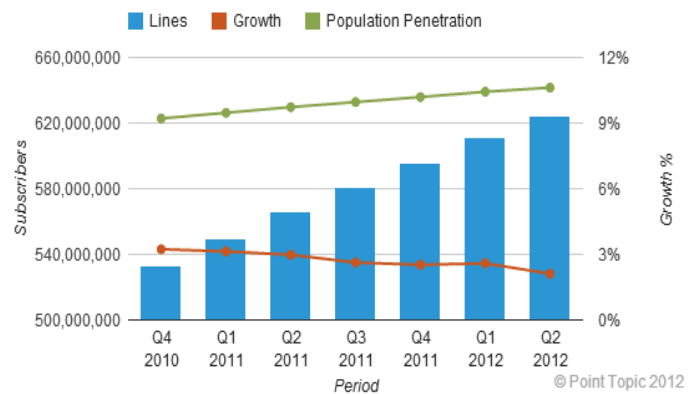

- Latest subscriber numbers at operator and country level published every 3 months
- Breakdown numbers for all major technologies (DSL, cable modem, FTTx etc.)
- Statistics for penetration, market share and growth
- Comprehensive historical data going back to 2002 (and 1998 in some cases)
- 5-year broadband forecasts for 115 countries
- Regular analyst reports tracking growth trends in the broadband and IPTV markets

Access Online

Browse the data at world, global region, country and operator level – including tables, graphs and charts to give you quick and easy access to the information you need.

Downloadable graphics help you interpret the information, including household and population penetration, operator market shares, growth and technology splits.

Analyst reports look at trends across different countries, regions, technologies and markets.
