TRIPLE PLAY

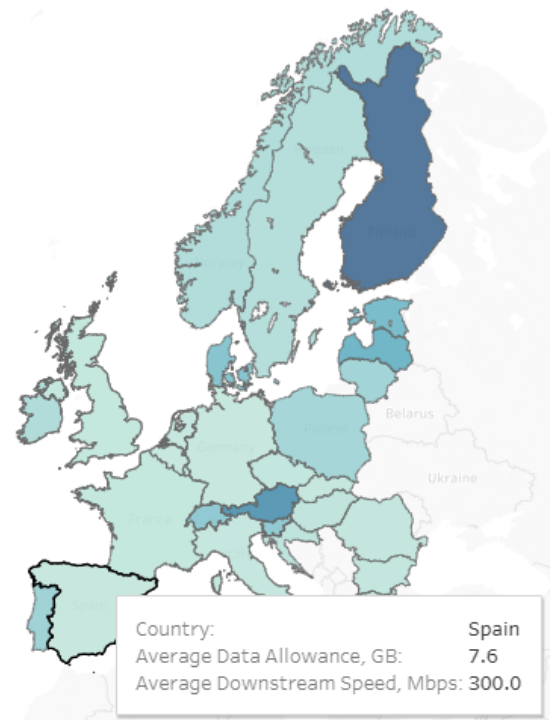

GET MORE FOR LESS

Following the example of the broadband market players we analyse, Point Topic decided that it is time to offer our customers more value for their money. From now on our subscribers will be able to get even more powerful insights by combining and analysing our extensive datasets on broadband pricing, take-up, coverage and other broadband market intelligence from fixed broadband markets around the world. The 4G LTE tariffs from Europe will help to add to the picture. See the attached case study as an example of combining various datasets.

Gigabit broadband rollouts in 2017

4G LTE Tariffs in Europe, Q4 2016

TRIPLE PLAY INCLUDES

Global Broadband Statistics is a searchable online database containing current and historical quarterly subscriber numbers for over 500 broadband, IPTV and VoIP operators from more than 100 countries.

Broadband Operators & Tariffs contains a series of regularly updated databases featuring more than 5,200 fixed broadband tariffs offered by 400 leading broadband, IPTV and VoIP operators from 90 countries.

Mobile Broadband Tariffs is a regularly updated resource which allows you to access the data on more than 800 4G LTE and LTE Advanced tariffs at operator and country level. Mobile tariffs offered by key mobile network operators from the EU-28 countries, Norway and Switzerland are included.
